How to use this supplement .....	iii
List of authorized compounds (supplement) .....	1

**On March 14, 1977, the Meat and Poultry Inspection Program was moved from the Animal and Plant Health Inspection Service (APHIS) to the newly created Food Safety and Quality Service. However, there have been no other changes in the Compound Evaluation program. All authorizations issued by the Compound Evaluation Laboratory while in APHIS remain valid if nothing else has changed to affect their validity.**

# **LIST OF CHEMICAL COMPOUNDS**

## **AUTHORIZED FOR USE UNDER USDA MEAT, POULTRY, RABBIT, AND EGG PRODUCTS INSPECTION PROGRAMS**

### **INTRODUCTION**

This supplement lists changes in, additions to, or deletions from the complete "List of Chemical Compounds" effective January 1, 1977. This supplement is to be used in conjunction with that publication, not as a replacement for it.

*THIS SUPPLEMENTARY LIST IS EFFECTIVE AS OF JULY 1, 1977*

Compounds authorized by letters from the U.S. Department of Agriculture after the effective date of this supplement are also acceptable.

### **CHANGES TO THE TEXT (PAGES 1 THROUGH 12)**

Wherever the term Animal and Plant Health Service or APHIS appears, replace it with Food Safety and Quality Service or FSQS as appropriate.

### **HOW TO USE THIS SUPPLEMENT**

When attempting to confirm the authorization for a particular compound, first check the complete listing in the previous edition of the "List Of Chemical Compounds." Whether or not the compound appears in that listing, also check this supplement to see if there has been an amendment to the complete listing which affects that compound. Amendments to the complete listing of compounds are indicated by a three character prefix followed by a slash mark. The prefixes used and the explanation of their meanings are as follows:

add/—indicates that authorization for the firm or compound following has been issued since the complete listing was printed. If the prefix precedes a firm name, authorization for all compounds below that firm name has been issued since the complete listing was printed.

del/—indicates that authorization for the firm or compound has been terminated since the complete listing was printed. If the prefix precedes a firm name, the authorization for all compounds listed under that firm name in the complete revision has been terminated.

chg/—indicates that authorization for the firm or compound has changed since the complete listing was printed. If the name of a firm or compound has changed, the former name under which it was authorized in the complete revision is identified on the following line. If no former name follows a compound change, the only amendment is in the category code letters indicating the authorized uses of the compound. The amendment may be the addition, deletion, or change of one or more category codes.

## LIST OF AUTHORIZED COMPOUNDS (SUPPLEMENT)

(In the following list, compounds are arranged alphabetically by trade name under the heading of the firm by which they are marketed)

### A

#### **A & R Product, Inc.**

add/Encore ..... A

#### **A B C Chemical Corporation**
